

LED Water Droplets

Information

With 6 LED bulbs, these Solar LED Water Droplets Fence Lights can emit brighter light than traditional garden lights when fully charged and with the light sensor, it will automatically turn on or off depending on light levels. During the day, solar panels will absorb energy, which will be accumulated in rechargeable batteries. 600mAh battery capacity can extend night working time. IP65 protection level, dust and splash-proof, very suitable for outdoor use. Easy to install and use! Can be installed anywhere, including gardens, terraces, fences, yards, roads, driveways, stairs, gates, walls, etc.

- Unique honeycomb design adds a sense of luxury
- Require no maintenance or wired power connection
- Solar-powered lights help you save money & energy
- The compact and mini design does not occupy much space
